## Framework basics

Besides countries in some cases Hungary also have a parallel bilateral agreement with the Pacific Alliance and the SEGIB and also with the Kurdistan Region of Iraq. In the following guide we will provide information regarding your possibilities and step by step instructions to select your application framework before starting your application in DreamApply.

The Stipendium Hungaricum Scholarship Programme is based on bilateral agreements which means the content of these agreements is different in case of each country and the eligible study fields and levels are decided by our governments. The agreements also determine the maximum quota, the maximum number of scholarships that Hungary can grant to the citizens of certain countries. Which is common between the countries and territories listed in this guide is that there are more than one bilateral agreements based on which its citizens are eligible to the scholarship. This means you need to select your application framework during the application process which cannot be modified later, so be careful.

Before providing you a step by step guide, we would like to enumerate the documents you will need to select your application framework.
