Corvinus University of Budapest has been an active participant of the Stipendium Hungaricum Scholarship Programme since 2013.
In the last 10 years there has been a significant increase in the number of scholarship holders, sending countries and our participating study programmes.
The range of services provided to SH and DFP students is increasing both in quantity and quality, the vast majority of which are also available to all international students and contributes significantly to the implementation of the CORVINUS internationalisation strategy.
