

# Stipendium Hungaricum in the Faculty of Informatics at ELTE

ELTE  
FACULTY OF  
INFORMATICS

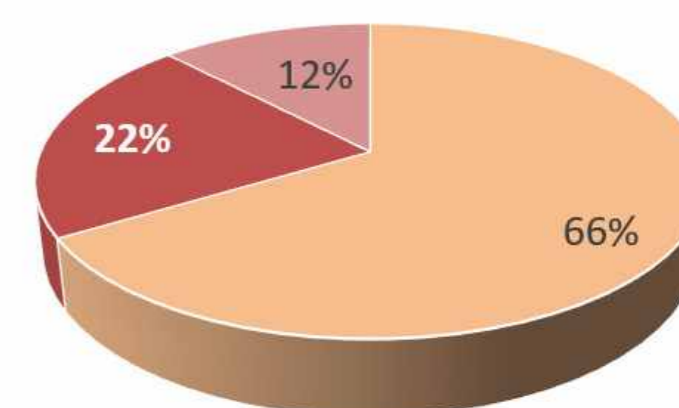

## Témakör: A SH program hatásai a felső oktatási intézményekre

Zoltán Horváth, *Past Dean of the Faculty of Informatics*

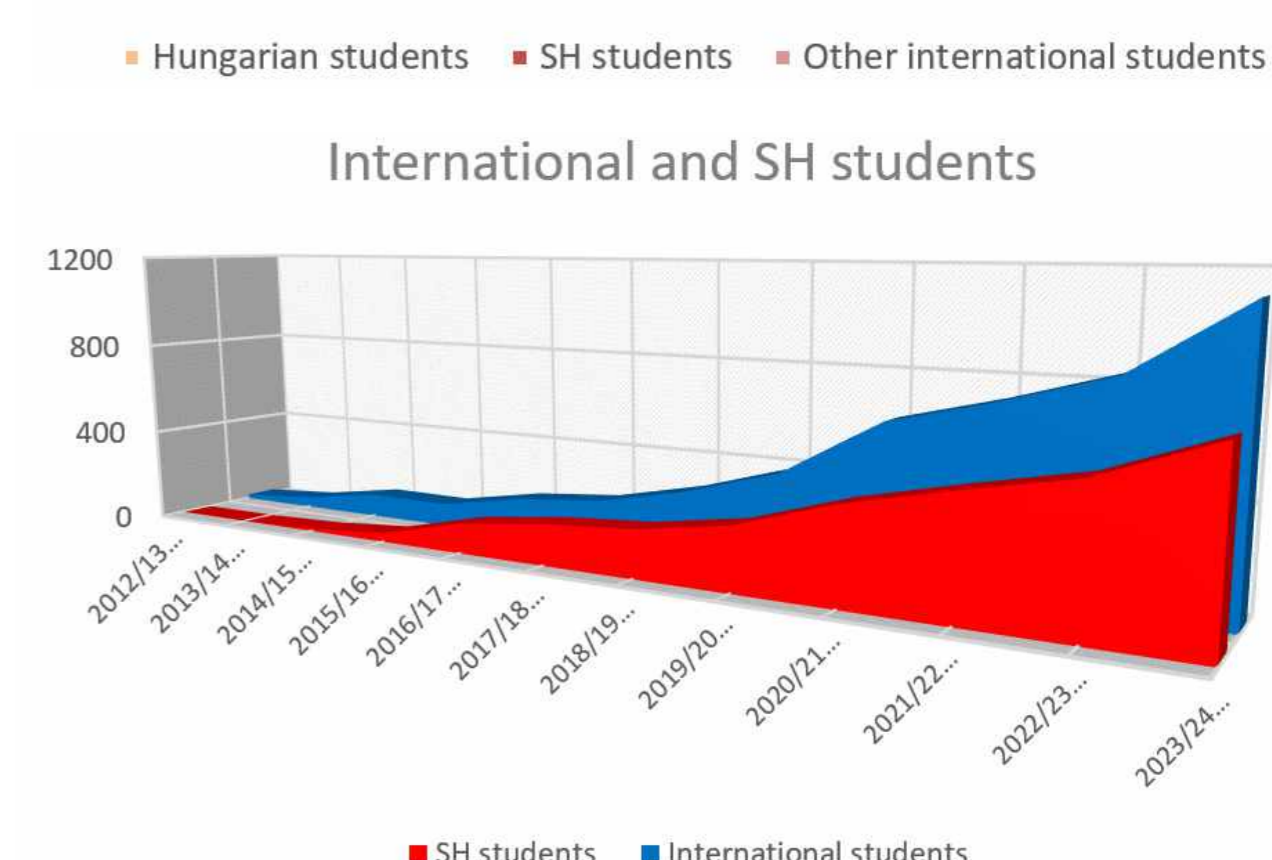

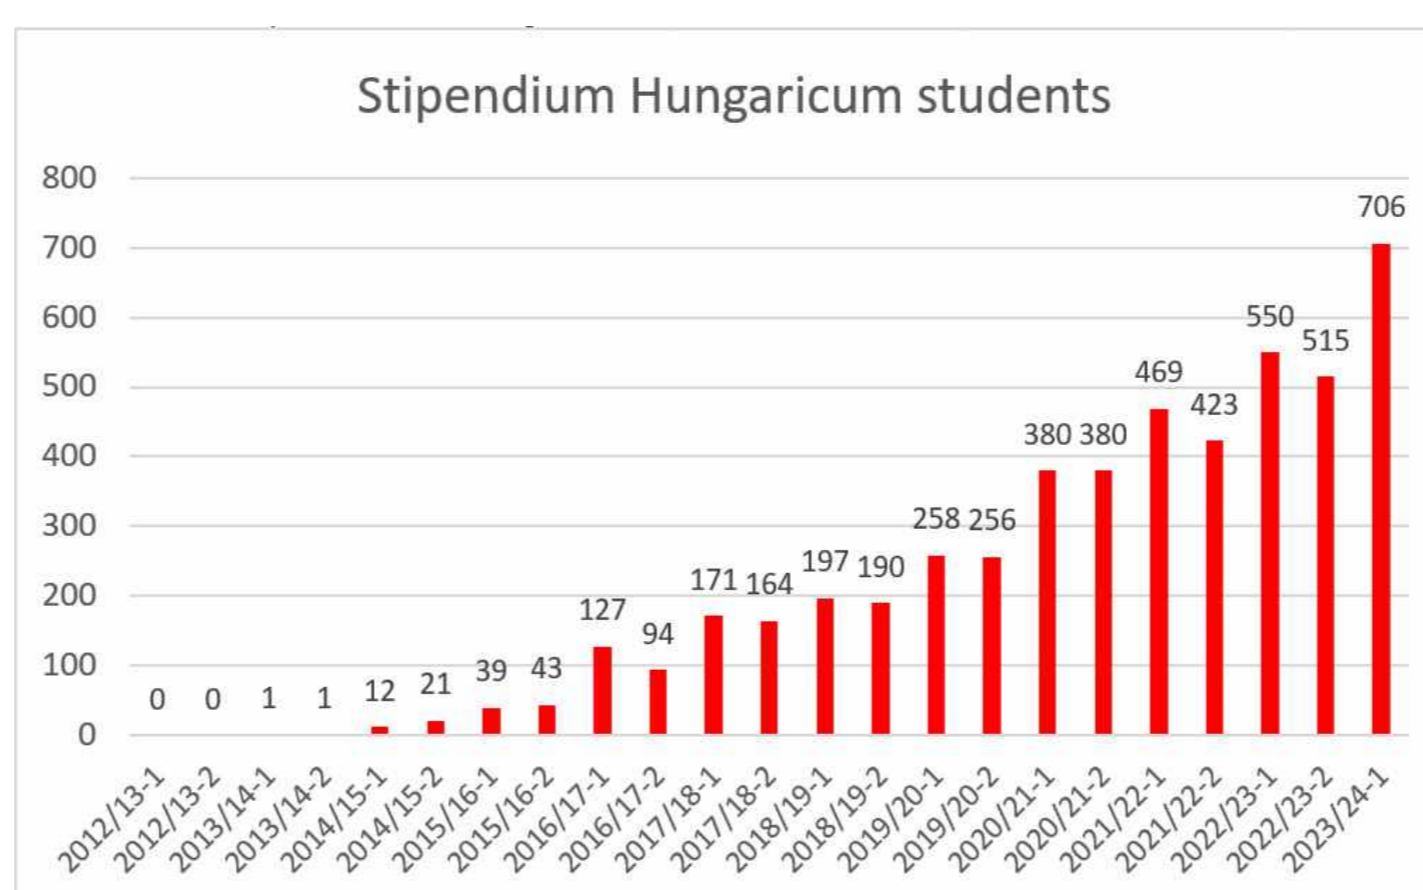

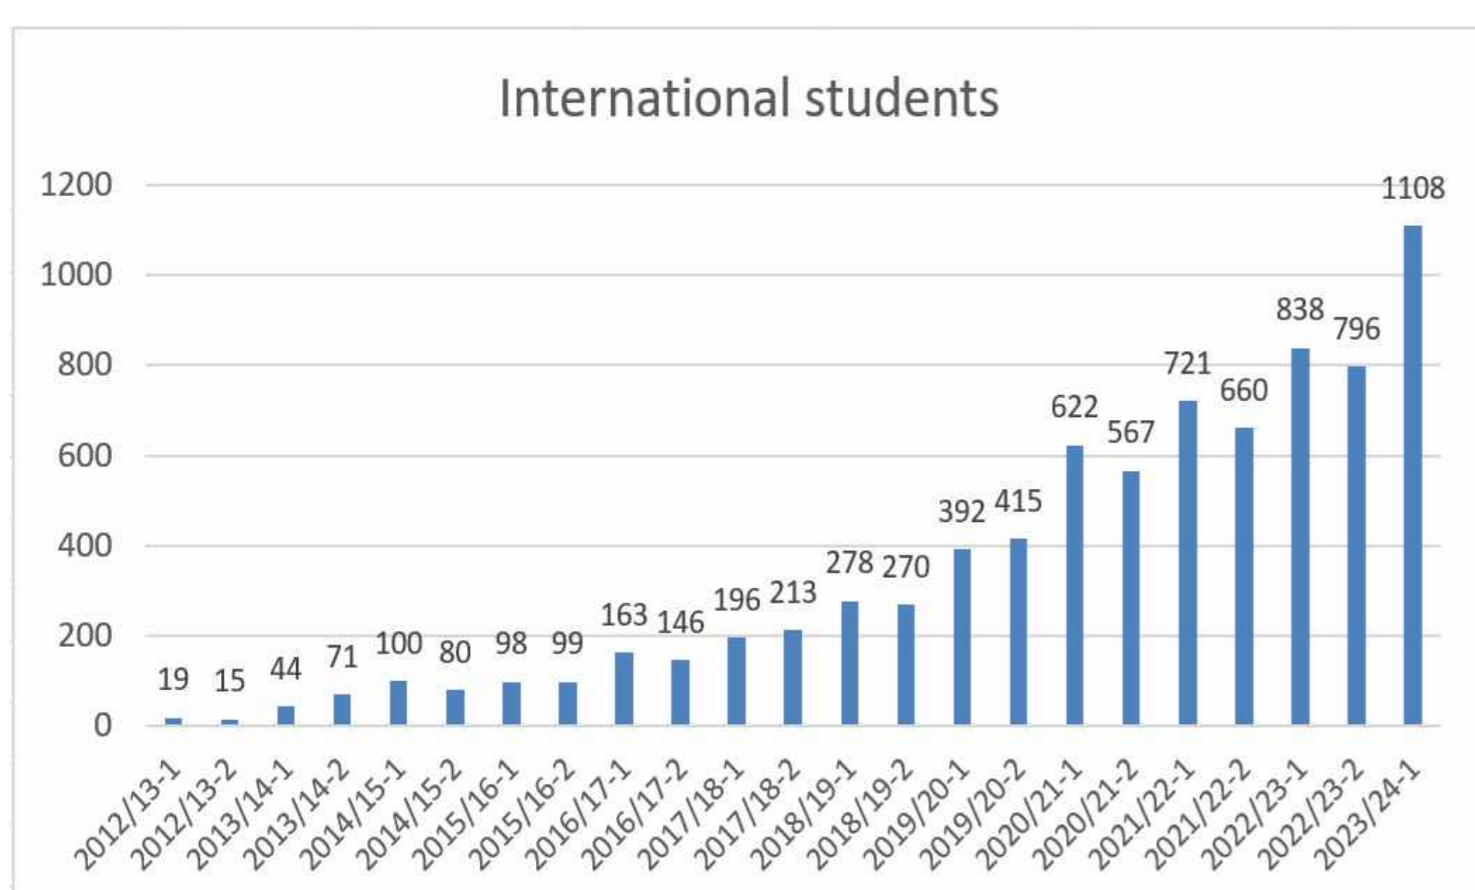

Katalin Schneider Ferencné, *Head of the Department of Academic and International Relations*

José Jesús Reyes Nunez, *Vice-Dean for International Affairs*

Students at the Faculty of Informatics (2023/2024)

Nothing better demonstrates the positive influence of the Stipendium Hungaricum Scholarship in the internationalization of the degrees offered by the Faculty of Informatics at Eötvös Loránd University than 10 years ago, when the program began, our faculty had only 15 foreign students and since so this number has grown to more than 1000 students from about 40 countries.

This intensive growth made it needed to introduce a series of initiatives with the aim of ensuring the success of our foreign students in their studies and covering different aspects of student life, as e.g., the foundation of a Student Support Program and Center, the organization of preventive, student effectiveness monitoring programs and a half-year preparatory training, as well as a mentoring system and Housing office service.

Members of the Student Support Center and some of the activities programmed by the center for the students

### Degrees offered for international students:

- Computer Science BSc
- Mechanical Engineering Bsc
- Computer Science MSc. *Specializations: Artificial Intelligence, Cybersecurity, Digital Manufacturing, Financial Technology, Information systems, Mathematical modelling, Software technology*
- Computer Science for Autonomous Systems MSc
- Cartography MSc
- Geoinformatics MSc (from September 2024)
- Ph.D. studies

One of the excursions organized by the Institute of Cartography and Geoinformatics for SH students attending the MSc in Cartography

7 September 2023: Welcome Ceremony at the Faculty of Informatics

Our international students can also take part in research projects organized in collaboration with partner companies, as well as to continue their studies in the doctoral programs that the faculty offers.
